

PHYSICO LINK

- Allows the **remote control** (through the **Internet**) of **4 PHYSICO devices**.
- A large amount of data can be stored thanks to its internal memory.
- The PC internet interface allows :
 - the visualization of the curves of the measured parameters : pH, free chlorine, total chlorine, temperature and redox.
 - the stored values export.
 - the list of alarms export
 - the change of the parameters of the connected devices
- PHYSICO-LINK has **two levels of password** to access only the visualization or even the settings of the devices.
- PHYSICO-LINK connects directly to the network with a RJ45 cable.
- **Features :**
 - 4 RS232 inputs for PHYSICO
 - 2 4/20mA analog inputs
 - RJ45 network connection
 - Standard power supply 230 Vac 50 Hz
 - Dimensions HxWxD : 20 x 20 x 12 cm

- **Applications :**

PHYSICO-LINK is ideal to remotely manage up to 4 PHYSICO devices and record the values of two 4/20 mA signals from other devices.
